New York, N.Y. 10023

Dear Peggy:

I want to thank you personally, in the name of Jim Shaw and the entire Wide World of Learning staff, for the excellent work you did relating to the Physical Geography segment of Schooldisc.

We are well aware of the many difficulties involved in producing an interactive disc...difficulties stemming from curriculum requirements, production schedules and budgetary restraints. In spite of these, you have created a fine "electronic lesson" which incorporates brilliant technological effects, sound educational materials and innovative learning devices. We are already receiving enthusiastic responses to your work on videocassette and are working to have the material pressed into videodisc format as soon as possible. Of course, we want you to see the final product when it is ready.

It is our hope that the quality and impact of the Physical Geography segment will encourage ABC management to continue the project under new procedures designed to save time, money and hassles. Until then, you can be proud to have worked on ABC's first venture into interactive video.

Cordially,

Dr. Peter P. Schillaci
